ERRATUM

Appendix A, Volume I.

In the chronological table under the date 1613, occur the words "St. John's Newfoundland founded—sixty two persons wintered who had been left by Whitbourne. (The British Empire in America, Vol. 1, page 7)."

In 1522, Sabine reports forty to fifty houses in Newfoundland and the consensus of opinion amongst historians is that those houses or the greater number of them were in St. John's.

In 1527, John Rut, in a letter to Henry VIII, reports fourteen vessels fishing from St. John's Harbour (Prowse, History of Newfoundland, 2nd Ed., pp. 40-41).

In 1582, Sir Thomas Hampshire laid down the rule that property in St. John's could only be retained by constant upkeep and permanent possession.

In 1583, Sir Humphrey Gilbert found a permanent and relatively large town when he formally annexed possession to the Crown of England in the name of Queen Elizabeth.

In 1583, Sir George Peckham, a patron and associate of Gilbert, recommended the fortification of the town.

These notes tend to show an error in the authority quoted in Volume I, and this amendment is added accordingly.

DEPARTMENT OF PUBLIC HEALTH AND WELFARE

Dr. H. M. Mosdell,
Secretary for Public Health and Welfare.

Sir,

Herewith for submission to the Honourable Commissioner for Public Health and Welfare, Part I of Volume II of the Report of the tenth Census of Newfoundland and Labrador, 1935.

This part of the Census is in two sections. Section I deals with families and dwellings and Section II deals with the occupations and earnings of the people; also records the number of Factories, Business Premises, etc., and gives a short analysis of unemployment for the year ended June 30th, 1935.

I have the honour to be,

Sir,

Your obedient Servant,

W. HALFYARD,
Statistical Officer.

St. John's, April 30, 1937.

SECTION I.
Families and Dwellings.

Census of Newfoundland and Labrador

1935

FAMILIES AND DWELLING HOUSES

The total number of occupied houses in Newfoundland and Labrador as given in the Census Returns of 1935, is 54,198. This figure gives 5.3 persons to each house.

These occupied houses afford accommodation to 60,569 families, and the number of persons per family is 4.7. When a comparison is made of the number of families to the number of occupied houses, it is found that about 6,400 of these houses have two tenements under one roof, and this provides for two families; in 1921 about 4,950 houses had two tenements under one roof.

HOUSES OWNED AND RENTED

The question regarding "houses owned or rented, value of owned houses and monthly rent paid" did not appear in the Census Schedules of previous Censuses, consequently comparisons with respect to the subject matter cannot be made.

The number of houses owned by the occupants is 46,996 or 86.7% of the total number occupied; the number of occupied houses, rented, is 7,202 or 13.3%. The value of all owned dwelling houses in Newfoundland and Labrador exceeds \$32,000,000.

A total of 7,323 families made returns of the monthly rent paid by them and 412 stated they paid no rent. In addition to these 5,838 families made no returns whatever regarding monthly rent. It would appear, however that these families are living with their parents or relations, use one or two rooms in the house and do not pay rent. If the total number paying rent and total number owning houses in Tables 5 and 6 are added for each particular district, the result will be the total number of families in the District.

The various Tables which follow give details of the value, etc., of dwellings, by Districts and Settlements.

SECTION II.
Occupations, Earnings and Buildings

OCCUPATIONS AND EARNINGS

The Tables herewith classify wage-earners, fifteen years of age and over, according to occupation and industry, and show earnings, by Sex, for Newfoundland, Labrador, and Districts.

The term "Wage Earner" as used in the Census means "a person who works for salary or wages, whether he be the general manager of a bank, railway or manufacturing establishment or only a day labourer."

"Earnings," as understood in the Census, include what is received from salary, wages, commission or piece work.

Persons were asked to state their total earnings for the twelve month period prior to June 30th, 1935.

Table 1 gives the per cent of earnings in each Industry to total earnings.

Table 2 gives the number of persons in various occupations, 1857-1921.

Table 3 gives the number of persons occupied and per cent of total population, Census years 1857-1935.

Table 4 gives the total number and earnings of persons in selected occupations. In this table male wage-earners have been classified separately from the females.

Table 5 classifies earnings in various groupings for Newfoundland and Labrador, with per cent to total reporting. A total of 77,730 males reported occupations, of this number 64,271 stated their earnings, leaving a balance of 13,459 who gave no information whatever as to the amount earned by them. Females to the number of 10,980 reported occupations and 8,930 stated their earnings. Of those not reporting earnings, quite a number refused to give any information to the enumerators and others gave a nil return. A total of 88,710, males and females, reported occupations.

Table 6 classifies earnings in various groupings, and various class of workers, by Districts.

Table 7 gives the figures for the various Class of Workers; also the number of persons who are not working but who live on Income, for Newfoundland and Labrador. A total of 2,857 persons, male and female, reported they were living on Income, out of this number 1,678 stated the amount of their Income; the total amount being \$375,571.

Table 8 classifies wage-earners reporting earnings by industry groups and sex, and shows the total earnings for Newfoundland, Labrador and Districts. The total number of wage-earners by Industry groups in this Table agrees with the total in occupations as given in Table 5, but in Table 5 are given the figures for those who did not state their earnings; consequently in the summary Table 8, of wage earners by industry groups, the total earnings should be for 64,271 males and 8,930 females.

Total Earnings

The total amount of earnings reported for Newfoundland and Labrador exceeds \$24,000,000; males reported \$23,100,000 and females \$1,800,000.

The total amount received by the males gives an average of \$360 to each male for the year, the females averaging \$200. As will be seen from Table 5, more than 25% of the males reporting earnings, earned less than \$100 during the year under review; 33% earned from \$100 to \$200 during

the year; 23.4% earned from \$201 to \$500; 11.5% earned from \$501 to \$1,000; 4.9% from \$1,001 to \$2,000 and 1.4% from \$2,001 and over.

It is noted from the returns of earnings given by males that 49% received up to \$200 for the year. Fully 90% of these gave their occupations as fishermen or loggers, the great majority, however, being fishermen.

Taking the females it is found that 46.7% who reported earnings received less than \$100 for the year; 23.9% from \$100 to \$200; 12.9% from \$201 to \$300 and the remaining 16.5% from \$301 and over for the year.

Per Cent of Earnings by Industries

The Table herewith may prove of interest, as it shows the proportion of earnings of each particular industry, to the total earnings. The percentages are shown for males and females and are based on the total earnings for each.

UNEMPLOYMENT**Period July 1st, 1934—June 30th, 1935****MALES**

In checking over the Census Returns we find that there are 97,300 males 15 years of age and over. Subtracting the number reported as being occupied and the number on Income from this figure gives the number of males unemployed during the year as 19,600.

FEMALES

In order to arrive at an approximate figure for unemployed females, using the same age limits as for males, several factors must be taken into account. Firstly, the number of those who stated their occupation; secondly, the thousands who are helping in the home, and thirdly, those who remain at home and who have not stated whether they are helpers in the home or not. The third class for purposes of this analysis are counted as being unemployed.

Those who stated they worked at home totalled 11,000 and if counted as employed, the total females employed would be 23,300.

The total females, 15 years and over, less married, is 39,300 and subtracting the total employed from this figure we find 17,300 as unemployed.

Finally, adding the males and females, we find that the number of unemployed for the period to be 36,900.

The following Table which gives occupations as compiled in previous Censuses may be of interest.

While there are but 4,226 who stated their occupations as farmers, there are thousands of fishermen and others who cultivate small strips of land, in addition to their usual occupation. This class is largely made up of fishermen-farmers. The great bulk of our population, however, is engaged in connection with the fisheries.

In 1857, 31 per cent of the total population were engaged in catching and curing fish; in 1868, 25.4 per cent; in 1874, 28.4 per cent; in 1884, 30.6 per cent; in 1891, 27.1 per cent; in 1901, 28.4 per cent; in 1911, 27.6 per cent; in 1921, 24.9 per cent; and in 1935, 12.1 per cent in catching only.

In previous Census years females were added to the total of those catching and curing fish, special columns being embodied in the Census schedules for these; also males of all ages were included. In the present Census females were not taken into account and only the males of 15 years of age and upwards were considered. This would account for the difference,

to some extent, in the number of males engaged in the catching of fish in 1921 and the number engaged in 1935.

The order in which the occupations would appear from the point of numbers engaged in them, exclusive of those in the Government Service, is as follows, viz: **Males**, (1) Fishermen, (2) Labourers and Unskilled workmen, (3) Longshoremen, (4) Loggers, (5) Farmers, (6) Carpenters, (7) Salesmen, (8) Miners, (9) Teachers and (10) Cooks. Only occupations in which 400 or more males are engaged are taken into account. **Females**, (1) Domestic Servants, (2) Teachers, (3) Stenographers and Typists, and (4) Nurses. Only occupations in which 300 or more females are engaged are taken into account.

BUILDINGS

The 1935 Census Schedules did not request information in relation to Churches, Schools or Charitable Institutions, as was furnished in returns of previous Censuses. Returns for Factory Buildings, Business Premises and Barns, etc., were recorded and are shown for Districts and Settlements. A Table showing the comparison with the figures of former Censuses is also given.

Included in the number of Factory Buildings are Paper Making Plants, Lobster Canning Factories, Rabbit Canning Factories and Cod Oil Factories, values also being included in the total for Factories.

Census of Newfoundland and Labrador, 1935

SECTION I

Fisheries, Vessels, Boats and Gear

FISHERIES

Table I. gives such particulars regarding the fisheries as are recorded in the Census Returns of past years. It will be noticed that in the early years the tonnage of Vessels employed in the Fisheries was quite as large as that of the present day, although the number of vessels was much smaller. This is explained by the fact that the sailing vessels used in the Seal Fishery were included in the returns, and, being large ships brought up the tonnage.

The total catch of fish was also given in past years' Census Returns. The present Census does not include this information, as the schedules did not request same, instead information was sought as to the home consumption of fish, and fuller information regarding Vessels, Boats and Gear and Value of same.

The 1935 Census Returns give 35,018 as engaged in the catching of Cod Fish, and 775 engaged in other fisheries, making a total of 35,793 in all fisheries; in 1921 the figure was 40,511; in 1911, 43,795. Included in the total figure for those engaged in catching Cod, are those who gave their occupation as (1) "Lobster and Cod" fishermen and (2) "Salmon and Cod" fishermen. They were included as Cod Fishermen, because that was the fishery at which they spent most time during the season.

The figures given in Table 4 for those engaged in the "Salmon", "Lobster", and other fisheries, are for those who stated they were engaged in these particular fisheries only.

Although there is a marked decline in the number of those engaged in the Cod Fishery from 1901 onwards, there does not appear to be any decrease in the number of fishing rooms, the figure for these remaining practically the same throughout the years.

The total amount earned by those catching cod exceeded \$4,500,000; other fisheries \$137,000, giving a total of \$4,637,000 earned in all fisheries.

Table 6 gives the total number engaged in the catching, curing or handling of fish or fishery products, by Districts; also the total earnings.

Table 7 gives the total number of persons, by Districts, who are directly or indirectly affected by, or whose means of support depend upon the fisheries.

Table 8 gives the number fishing in the various fishing areas by Districts.

Table 9 shows the total quantity of the various kinds of fish consumed by the population.

It is estimated that 40% of the total population of Newfoundland and Labrador are dependent on the Fisheries for a living.

Vessels, Boats and Gear

Owing to absence of detail, the figures given in Table 2 relating to Sailing Vessels for the years 1857-1874, must be taken to represent all vessels of whatever tonnage.

Being a maritime people, with the riches of the seal and cod fisheries at our door, the returns of Ships and Boats will always be important—the increase or decrease in the figures indicating the fluctuations in the prosecution of the fisheries caused by short catches or unremunerative markets. Tables 10 and 11 set out the fishing equipment and value of same owned by fishermen.

The total number of vessels prosecuting the fishery is 1,317, tonnage 48,151: in 1921 there were 1,284 vessels, tonnage 39,565; and in 1911, the vessels numbered 1,852 the aggregate tonnage being 66,049.

Included in the total number of Dories are boats of all kinds, as from the returns submitted it appears that the enumerators made no distinction between Dories, Punts or other boats when entering the information in the column headed "Number of Dories."

In the Tables for Vessels, Boats and Gear, Settlements giving no returns have been omitted.

The total value of all fishing equipment, including fishing rooms exceeds \$6,000,000.

Census of Newfoundland and Labrador, 1935

SECTION II

Occupied Land, Produce, Live Stock and Live Stock Products

1. OCCUPIED LAND AND PRODUCE

As was the case in previous Censuses, the particulars required under this head seem to have caused the enumerators much trouble, and it has been necessary for the compilers to exercise great care in order to arrive at a near correct total for the various areas of land under produce.

As Agriculture has not been the chief aim of those occupying land—it being considered an auxiliary to other employment—there was usually some difficulty in obtaining precise information upon the points set out on the Census Schedules. Much difficulty was experienced in getting the area of land under the various crops, and as the people had no record of their produce they could give but an estimate of the quantity grown.

The number of acres of land occupied is 215,462, being nearly an acre for each inhabitant; for those owning land or heads of families the average is 5.4 acres each. A total of 71,697 acres are recorded as “improved”; 31,759 acres in pasture; 112,006 acres in woods or timber and 20,500 acres in vegetables.

The number giving their occupation as Farmers is 4,226 or 1,000 more than in 1921. In addition to Farmers; a total of 35,582 persons cultivated the land. A quantity of the crops produced was sold, but the greater proportion was kept for use in the home.

CROPS PRODUCED

The quantities of crops grown as given in the Census Returns for the year 1934 were as follows:—Potatoes 2,052,928 bushels; turnips 95,445 barrels; cabbage 14,207,965 pounds; hay 52,459 tons; other root crops 44,912 bushels. The total value of all agricultural products—vegetables and fruit—is \$3,267,650.

No provision was made in the Schedules for the quantity of Wheat, Barley and Oats grown, but columns for the quality of grain threshed and kind of grain were provided.

The returns give 3,750 bushels of grain as being threshed, valued at \$3,000. This grain consisted of Oats and Wheat.

The estimated values used in order to arrive at the total value of the various crops—and may be used to get the total value per settlement—were as follows, namely:—

Potatoes, per bushel	\$ 0.70	Grain, per bushel.....	\$0.80
Turnips, per barrel	1.50	Fruit	
Cabbage, per pound	0.02	Plums, Cherries, per gal.	0.70
Other Vegetables, per bushel	0.75	Strawberries, per gal.	0.70
Hay, per ton	24.00	Currants, Gooseberries, per gal.	0.70
Other Fodder, per ton	20.00	Other small Fruits, per gal.	0.12

WILD FRUIT

The returns given for Wild Fruit do not appear to be complete and only a fraction of what one would expect to see in certain districts are entered, this is due to the carelessness of the enumerators in not obtaining the information from the various families in these Districts.

2. LIVE STOCK, LIVE STOCK PRODUCTS AND FURS

In the Census of 1921, and previous Censuses the schedules called for the total number of horses, but did not specify mares, stallions or ponies. The present Census gives separate totals for mares and stallions and special columns were provided for Ponies. Special columns were provided for Steers and Bulls in addition to the columns for cows and other horned cattle which were provided for in the 1921 Census.

The Tables following, under Animals and Animal Products, show the totals for previous Census Years as compared with the present Census and give the totals for Districts and Settlements for the present Census.

It will be noticed that there is a decrease in the number of milch cows and swine, but increases are shown in the number of goats, sheep, other horned cattle, poultry, eggs and in the quantity of butter produced.

In order to obtain the total value of Live Stock and Products for Districts the following estimated values were used, namely:—

	Value Each		Value Each
HORSES		COWS Over 2 Years	
Mares over 2 years of age	\$100	Grade	\$ 60
Stallions over 2 years of age	250	Purebred	100
